

Firmware Download Tool V6.0.181 (December 2020)

Novelties:

- Download of latest firmware packages via "Siemens Software Update Check". Available firmware versions can be updated, if there is an internet connection. At the start, a message appears if new versions have been made available.
The available versions are displayed in menu "Details - Available firmware updates".
- Notes about firmware versions <https://www.siemens.com/gamma-fdt>.
- Manual entry of the KNX interface with IP address or host name for remote access.
- Firmware update for IP Routers secure N 146/03 and IP Interface secure N 148/23 directly via IP.
- Note for KNX/DALI Gateway N 141/31:
Application program 98330x works up to firmware V07 only.
Application program 983D0x can be updated higher than firmware V07.
- Error messages reworked.
